algebra and trigonometry presents the essentials of algebra and trigonometry with some applications the emphasis is on practical skills problem solving and computational techniques topics covered range from equations and inequalities to functions and graphs polynomial and rational functions and exponentials and logarithms trigonometric functions and complex numbers are also considered comprised of 11 chapters this book begins with a discussion on the fundamentals of algebra each topic explained illustrated and accompanied by an ample set of exercises the proper use of algebraic notation and practical manipulative skills such as factoring using exponents and radicals and simplifying rational expressions is highlighted along with the most common mistakes in algebra the reader is then introduced to the solution of linear quadratic and other types of equations and systems of equations as well as the solution of inequalities subsequent chapters deal with the most basic functions polynomial rational exponential logarithm and trigonometric trigonometry and the inverse trigonometric functions and identities are also presented the book concludes with a review of progressions permutations combinations and the binomial theorem this monograph will be a useful resource for

undergraduate students of mathematics and algebra

julie miller wrote her developmental math series because students were coming into her precalculus course underprepared they weren t mathematically mature enough to understand the concepts of math nor were they fully engaged with the material she began her developmental mathematics offerings with intermediate algebra to help bridge that gap the precalculus series is a carefully constructed end to that bridge that uses the highly effective pedagogical features from her fastest growing developmental math series what sets julie miller s series apart is that it addresses course issues through an author created digital package that maintains a consistent voice and notation throughout the program this consistency in videos powerpoints lecture notes and group activities coupled with the power of aleks and connect hosted by aleks ensures that students master the skills necessary to be successful in precalculus and can carry them through to the calculus sequence
