this book presents a remarkable diversity of contemporary opinions on the prospects of addressing philosophical topics from a psychological perspective it considers the history and philosophical merits of psychologism and looks systematically at psychologism in phenomenology cognitive science epistemology logic philosophy of language philosophical semantics and artificial intelligence

essays discuss behaviorism reductionism physicalism functionalism the nature of mental states and the foundations of psychoanalysis

history and philosophy of psychology is a lively introduction to the historical development of psychology its distinct inclusion of ideas from both eastern and western philosophies offers students a uniquely broad view of human psychology whilst covering all the major landmarks in the history of psychology the text also provides students with little known but fascinating insights into key questions â such as whether freud really cured his patients what was nude psychotherapy and were the early psychologists racist encourages students to explore the philosophical and theoretical implications of the historical development of psychology explores key theoretical ideas and experiments in detail with background to their development and valuable suggestions for further reading

psychology aims to give us a scientific account of how the mind works but what does it mean to have a science of the mental and what sort of picture of the mind emerges from our best psychological theories this book addresses these philosophical puzzles in a way that is accessible to readers with little or no background in psychology or neuroscience using clear and detailed case studies and drawing on up to date empirical research it examines perception and action the link between attention and consciousness the modularity of mind how we understand other minds and the influence of language on thought as well as the relationship between mind brain body and world the result is an integrated and comprehensive overview of much of the architecture of the mind which will be valuable for both students and specialists in philosophy psychology and cognitive science

philosophy of psychology is a well structured introduction to the nature and mechanisms of cognition and behaviour from one of the leaders in the field

edited by marianne sawicki translated by mary catharine baseheart and marianne sawicki edith stein's analysis of the interplay between the philosophy of psychology and cultural studies particularly psychoanalytic theory and behaviorism do i have to is the most human of all questions children ask it when told to go to sleep adults ponder it when faced with the demands of the workplace the family or their own emotions and addictions we find ourselves always poised between freedom and necessity in this volume her most profound and carefully argued phenomenology of human creativity edith stein explores the interplay of causal constraints and motivated choices she demonstrates that physical events and physiological processes do not entirely determine behavior the energy deployed for living and creativity exceeds what comes to us through physical means the human body is a complex interface between the material world and an equally real world of personal value the body opens as well to community stein shows that strictly speaking there is no such thing as a solitary human being communities are reservoirs of the meaning and value that fuel both our everyday choices and our once in a lifetime accomplishments this basic fact she argues is the starting point for any viable political or social theory the two treatises in this book comprise her post doctoral dissertation that stein wrote to qualify for a teaching job at a german university just after the first world war they ring with the joy hope and confidence of a brilliant young scholar today they continue to challenge the major schools of twentieth century psychology and cultural studies particularly psychoanalytic theory and behaviorism here too is the intellectual manifesto of a woman who would go on to become a christian and a carmelite nun only to be killed at auschwitz like so many others of jewish ancestry

what is the relationship between common sense or folk psychology and contemporary scientific psychology are they in conflict with one another or do they perform quite different though perhaps complementary roles george botterill and peter carruthers discuss these questions defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science their focus throughout the book is on the ways in which cognitive science presents a challenge to our common sense self image arguing that our native

conception of the mind will be enriched but not overturned by science the philosophy of psychology is designed as a textbook for upper level undergraduate and beginning graduate students in philosophy and cognitive science but as a text that not only surveys but advances the debates on the topics discussed it will also be of interest to researchers working in these areas

taking up the general challenge of situationism that philosophers should pay attention to empirical psychology this interdisciplinary volume presents new essays from empirically informed perspectives by philosophers and psychologists on western as well as eastern conceptions of character virtue and happiness and related issues such as personality emotion and cognition attitudes and automaticity

the routledge companion to philosophy of psychology is an invaluable guide and major reference source to the major topics problems concepts and debates in philosophy of psychology and is the first companion of its kind a team of renowned international contributors provide forty two chapters organised into six clear parts i historical background to the philosophy of psychology ii psychological explanation iii cognition and representation iv the biological basis of psychology v perceptual experience vi personhood the companion covers key topics such as the origins of experimental psychology folk psychology behaviorism and functionalism philosophy psychology and neuroscience the language of thought modularity nativism and representational theories of mind consciousness and the senses personal identity the philosophy of psychopathology and dreams emotion and temporality essential reading for all students of philosophy of mind science and psychology the routledge companion to philosophy of psychology will also be of interest to anyone studying psychology and its related disciplines

psychology and philosophy provides a history of the relations between philosophy and the science of psychology from late scholasticism to contemporary discussions the book covers the development from 16th century interpretations of aristotle s de anima through kantianism and the 19th century revival of aristotelianism up to 20th century phenomenological and analytic studies of consciousness and the mind in this volume historically divergent conceptions of psychology as a science receive special emphasis the volume illuminates the particular nature of studies of the psyche in the

contexts of aristotelian and cartesian as well as 19th and 20th century science and philosophy the relations between metaphysics transcendental philosophy and natural science are studied in the works of kant brentano bergson husserl merleau ponty wittgenstein and davidson accounts of less known philosophers such as trendelenburg and maine de biran throw new light on the history of the field discussions concerning the connections between moral philosophy and philosophical psychology broaden the volume s perspective and show new directions for development all contributions are based on novel research in their respective fields the collection provides materials for researchers and graduate students in the fields of philosophy of mind history of philosophy and psychology
